If you produce data, publish it.
If you have data, use it.
If you don’t have data, demand it.

There may be aid money coming in, but if that money is not published in one place, on time and in full, then it is hard for governments to plan, donors to coordinate and civil society to hold them accountable.

We believe over 80% of aid needs to be visible for it be to useful.

In 2013, for 10 of the most aid dependent countries:

- $4.8bn of EU aid was not visible
- $2.8bn of U.S. aid was not visible
- $13.4bn of official donor aid was not visible

% of EU aid visible on IATI, selected countries

- Myanmar 21%
- Côte d’Ivoire 25%
- Afghanistan 40%
- Haiti 43%
- DRC 46%
- Mozambique 57%
- Liberia 58%
- Tanzania 65%
- Malawi 71%

80% TARGET
EU aid – 47% visible

% of U.S. aid visible on IATI, selected countries

- Myanmar 0%
- DRC 0%
- Côte d’Ivoire 0%
- Mozambique 35%
- Tanzania 37%
- Kenya 44%
- Haiti 57%
- Afghanistan 59%
- Malawi 64%
- Liberia 73%

U.S. aid – 38% visible

% of total aid visible on IATI, selected countries

- Côte d’Ivoire 24%
- Myanmar 45%
- Mozambique
  - Kenya 57%
  - Tanzania 57%
- DRC 63%
- Haiti 68%
- Afghanistan 74%
- Malawi 72%

Total ODA – 58% visible

All figures are for 2013

2. All data is for the year 2013 and is based on ODF reported vs. Spend published/not published to IATI.

This includes information on donors that report to the OECD DAC’s Creditor Reporting System only.
